

FertileEarth PRO FORMULA

FORMULA

6

10-20-10-5 + BioNatra

STARTER FORMULA

GUARANTEED ANALYSIS

Nitrogen (N)	10.0%
Ammonium Nitrate	7.0%
Urea	2.0%
Nitrate	1.0%
Phosphorous	20.0%
Potassium	10.0%
Sulphur	5.0%
BioNatra	7.0%
Inert Ingredients	48.0%

Derived From: Ammonium Nitrate, N32, Phosphoric Acid, Potassium Hydroxide, Ammonium ThioSulfate.

BioNatra is derived from 37 naturally occurring microbial strains, simple and complex carbohydrates, amino acids, crustacean extracts and enriched with trace amounts of K, P, S, B, Cu, Fe, Mn, Mg, Zn.

PRODUCT DESCRIPTION

Pro Formula 6 (F6) is a potent high phosphate fertilizer with a 2-4-2-1 NPKS ratio plus BioNatra. Phosphorous is crucial for genetic material (DNA & RNA) formation; stimulates fruit, flower and root production, and early season growth. Since it is essential in the early stages of plant development F6 is an excellent starter fertilizer for establishing new lawns, bedding plants and nearly all transplants. Phosphorous also helps stimulate the formation of buds in many bedding plant species to add color and vibrance to flower beds. Sulphur, BioNatra Plus conditions the soil and works to solubilize nutrients that are otherwise bound up in the soil. F6 uses Fertile Earth's blend of 3 forms of nitrogen to provide continuous nitrogen availability. Pro Formula 6 is optimized for slow feed application through the Fertile Earth Feeder but can also be used in spray rigs, hose end sprayers, and other fertigation devices.

PRODUCT SPECIFICATIONS

Packaging: Liquid concentrate—1 gallon, 2.5 gallon, 275 gallon tote.

Weight: 1 Gallon 10.8 lbs.

2.5 Gallons 27 lbs.

275 Gallon Tote 2970 lbs.

Macronutrients: Nitrogen (N), Phosphorous (P2O5), Potassium (K2O), Sulphur (S)

MicroNutrients: Trace amounts of Fe, Zn, Mn, Cu, Mg, B

Coverage: See Application Guide (reverse side)

PRO SERIES DIFFERENCE

FERTILE EARTH'S PRO SERIES FORMULAS are advanced liquid fertilizers designed for use by landscape professionals to achieve outstanding results in plant nutrition. In addition to premium macro & micro nutrients Fertile Earth Professional Series Formulas contain BioNatra a certified organic bio-stimulant that increases healthy microbial activity in the plant/soil system. Microbes accelerate the breakdown and conversion of decomposing organic matter into humus; the most natural source of plant nutrition. Microbes also improve nutrient up take, release essential minerals, produce antibiotics to prevent root disease and release growth hormones not available in traditional fertilizers.

BioNatra is a complex organic ingredient that also encapsulates nitrogen molecules to minimize volatilization and leaching. BioNatra improves the soil structure, works as an antifungal, minimizes the formation of hard water deposits and actually works to keep pipes, heads, valves and emitters clean.

All Fertile Earth Pro Series Formulas can be applied in conjunction with most herbicides, insecticides and fungicides and will not stain or burn when properly applied. Each Professional Series product is optimized for distribution through the Fertile Earth Feeder and will deliver excellent results, guaranteed!
